Kim and Rene

two lists for you regarding completed interviews on my end. Also, please note that the last batch of PDF maps should replace the earlier batch you made available to HGL teams awhile ago. The newer batch has more details on the areas of concern taken from the interviews - as a reminder. Soon I'll have the full interview notes for you if you still need them for the record - typing them up is taking time - but, please remember I have gone through them and confirmed that the areas on the maps with notations, that I recently sent you, are the ONLY areas of concern derived from my interviews and the only useful information gathered.

Kim, I may have already sent you some version of the second list. It is a list of individuals that the interviewees thought may be able to help us with our investigation (note that many do not have any contact information whatsoever and several are deceased...) Please compare against your lists and the DOE lists for me. Thanks.

List #1 (excel spreadsheet attached also)

This is a list of individuals interviewed by Andrew Taylor (by phone or in person)					
	last name	first name	Relevant (Area IV knowledge)	Provided locations of concern sampling effort in Area IV?	Areas of concern placed on PDF Historical Maps?
